We would like to invite JSPCCS members to join us at the upcoming *Innovations in Pediatric Heart Failure Symposium* in San Diego, California, USA from December 3-5, 2015. This meeting is jointly sponsored by the Heart Institutes at Rady Children's Hospital/UC San Diego School of Medicine and the Children's Hospital of Orange County (CHOC). This state-of-the-art, interactive program is specifically designed for those involved in the care of patients with pediatric heart disease including pediatric cardiologists, surgeons, intensivists, nurses, trainees and other allied health professionals. Nationally recognized faculty members from over 20 institutions will cover challenging heart failure topics related to: cardiomyopathies, end stage congenital heart disease (including failing Fontans), heart transplantation, ventricular assist devices, interventional cardiology, cardiac ICU management, nursing care, genomics, cardiac imaging, pharmacotherapeutics, ethics and end of life care, electrophysiology and more!

Our focus will be on *innovation*, and as such, the conference format will be unique! There will be interactive sessions that are case-based and dependent on audience participation. Expert panels will be assembled to help answer the difficult management questions the clinician faces in their practice. Didactic sessions will be limited to short PowerPoint presentations. Workshops will be available to provide hands-on training for trainees, nurses and junior faculty members. The symposium will be held at the beautiful Loews Coronado Bay Resort hotel on Coronado Island, San Diego, CA USA (<http://www.loewshotels.com/coronado-bay-resort/>).

**Confirmed guest faculty members include:**
